

Communications Data Hosting powered by Google for Business

This service sees your communications data (email, calendar and contacts), hosted in the cloud, securely encrypted and backed up daily. All said data can be synchronised with your computer (PC/Mac) as well as mobile devices running IOS (iPhone/iPad) and Android. PCs require MS Outlook 2007 or later to take full advantage of the synchronisation whilst Macs utilise the native Mac Mail, iCal and Address Book. All data is also securely available online via your web browser (webmail).

Prices are structured on a sliding scale as follows:

- 1 mailbox/email account: £10.80/month (billable annually)
- 2 mailboxes/email accounts: £9.60/month/mailbox (billable annually)
- 3 mailboxes/email accounts: £8.40/month/mailbox (billable annually)
- 4 mailboxes/email accounts: £7.20/month/mailbox (billable annually)
- 5 or more mailboxes/email accounts: £6.00/month/mailbox (billable annually)

All mailboxes require a backup bolt-on, which backs up all mail, calendar and contacts data from the server, to a separate, cloud-based backup system. This eliminates the need for users to make backups on their local computers for the hosted data, and also allows simple, one click restores - particularly useful when recovering to and from Microsoft Outlook.

The backup bolt-on is priced at:

- £4.20/month/mailbox (billable annually)

All prices are inclusive of VAT @ 20%
